WHY TO BUY

Easy to install, easy to use and fast during the connection.

The new standard V.92 permits a fast connection ignoring some steps of the training sequence and establishing the connection in a very fast way. Moreover it permits a communication in upstream up to 48Kbps. Thanks to the V.44 protocol it improves the dates compression up to 30%, reducing the waiting time.

The software permits to use the modem also as digital answer-phone. It could be also used as a real telephone / fax.
