## TECHNICAL SPECIFICATIONS: S420

For projects requiring high server density and Pentium III performance with 133MHz front-side bus and memory expansion to 1.5GB, Cubix offers the S420 server. The S420 also features a sound chip for those applications requiring audio support.

Eight S420 servers can be hosted in a single Density D302 chassis, with support for one internal SCSI drive and one full length PCI expansion slot available for each server. Projects requiring more than one internal SCSI drive are better suited to the D301 chassis which hosts four S420 servers and provides support for three internal SCSI hard drives for each server.

For assistance in creating a configuration that best fits your project needs, submit a [configuration request](#) or call a [Cubix representative](#)

<b>Intel® Processor</b>	Supports Intel Pentium® III 667MHz or 866MHz processor
<b>Front-Side Bus</b>	133MHz bus
<b>L2 Cache</b>	256KB Full Speed w/Pentium III
<b>System Chip Set</b>	VIA Apollo Pro 133
<b>ECC Memory</b>	<ul style="list-style-type: none"> <li>• 64MB ECC SDRAM (base configuration)</li> <li>• Speed: PC-133MHz</li> <li>• Type: 72 Bits ECC Unbuffered or Registered (cannot be mixed type)</li> <li>• Slots: 3</li> <li>• Maximum: 3 x 512MB DIMMS</li> </ul>

<b>Peripheral Bus</b>	PCI (support for one expansion slot)
<b>System BIOS</b>	AMI BIOS
<b>Super Serial I/O</b>	<ul style="list-style-type: none"> <li>● SMC 37M12</li> <li>● Com 1 on end bracket</li> <li>● Com 2 on header (Ext. break out optional part #DSPCOM2)</li> <li>● UART 16C550 Compatible 230Mbps maximum</li> </ul>
<b>Universal Serial Bus</b>	on header (requires top hat module part# USB-DFF)
<b>Parallel Port</b>	LPT 1 available on header (Ext. break out optional part # LPT-DFF)
<b>Ethernet Ports</b>	<ul style="list-style-type: none"> <li>● Dual Integrated RJ-45 10/100 Base TX</li> <li>● Intel 82559 Controllers</li> </ul>
<b>Video VGA Support</b>	<ul style="list-style-type: none"> <li>● S3 Savage 4 chip set</li> <li>● 8MB Video RAM</li> </ul>
<b>Audio Support</b>	<ul style="list-style-type: none"> <li>● Cirrus Logic CS4281/CS4297A chip set</li> <li>● Line Out on end bracket (mini stereo plug)</li> <li>● Line In on end bracket (mini stereo plug)</li> </ul>
<b>Video/Keyboard/Mouse</b>	Board header (individual ext. break out optional part #DVKMB3)
<b>SCSI Support</b>	<p>Connection:</p> <ul style="list-style-type: none"> <li>● Internal support only</li> <li>● Type: Wide Ultra2 LVD (80MB max. transfer rate)</li> </ul> <p>Single ended (40MB max. transfer rate) Chipset: Symbios 53C895</p>
<b>Power</b>	+5VDC 7.6A Max; +12VDC 0.25A Max; -12VDC 0.05A Max; 41.6W Max Power – Does not include IDE hard drive power
<b>Warranty</b>	3 Years Parts and Labor – return to manufacturer
